

2014

SANOFI FOUNDATION
FOR NORTH AMERICA

Letter from the President

Dear Colleagues and Friends of the Sanofi Foundation,

As President of the Sanofi Foundation for North America and Vice President of Corporate Social Responsibility (CSR) for North America, I am pleased to present to you the 2014 Foundation Annual Review. During the past year we have strengthened and diversified our role and impact, focusing on the efforts of our employees across several Sanofi businesses as well as our relationships with key non-profit partners.

Sanofi's four CSR pillars – Patient, People, Ethics and Planet – emphasize our collective priorities and also provide the framework of all initiatives supported through the Foundation.

The following pages feature a myriad of facts and figures highlighting the Foundation's commitment to assisting those locally, nationally, and globally. Yet, these numbers tell only part of the story. . . a life protected; a hand held during a time of need; tools, funding, and resources required for a fresh start. . . these are the truths of the many we proudly served in 2014.

*We hope this report informs, inspires, and provides **hope** for both readers and beneficiaries alike.*

Thank you for investing YOUR time as you learn about our recent contributions.

A handwritten signature in black ink that reads "John M. Spinnato".

SANOFI FOUNDATION FOR NORTH AMERICA OVERVIEW

- Purpose and Mission
- Board of Directors
- Officers of the Foundation

2014

Purpose and Mission

At the Foundation, we strive to reduce healthcare inequalities in the U.S. through strategic charitable donations and by establishing partnerships with Non-Profit Organizations that have broad expertise in our long-term priorities. The Foundation consists of the following areas:

- ▶ Access to Healthcare – Product is donated to the Foundation by the company (Sanofi US and its affiliates) to provide prescription drugs at no cost to patients who have no insurance coverage or do not have access to the prescribed product or treatment via their insurance, and who meet program eligibility requirements. The program is administered through Sanofi Patient Connection™. Additionally, financial funding is provided for Co-Pay assistance to organizations with non-profit status to provide direct financial assistance to insured patients who meet program criteria.
- ▶ Social Investments – The scope of the Foundation also includes a financial donation component, which is used to support and partner with 501(c)(3) organizations that are strategically aligned with our mission.
- ▶ Volunteerism – Sanofi and The Sanofi Foundation encourage and promote employee volunteerism as we give back to the communities in which we live and work, thereby donating our skills, knowledge, and time to key non-profit organizations.

Board of Directors

As of December 1, 2014, the Sanofi Foundation for North America is governed by a Board of Directors, comprised of Sanofi corporate executives, that meet two times annually. The day-to-day operations are managed by the officers below:

Bernard Amoury
Global Supply Chain
Operation, Industrial Affairs

Damian Braga
President US, SR. VP Global
Commercial Operations
Sanofi Pasteur

Greg Irace
Senior Vice President,
Global Services

Doug Jones
Head of North American
Business Operations,
Meril Ltd.

David Meeker
CEO
Genzyme

Jez Moulding
President North America
Pharmaceuticals, North America
Pharmaceutical Operations

John Spinnato
President, Sanofi Foundation
for North America
Vice President,
Corporate Social Responsibility
Foundation and Sanofi US

Doug McCormack
Vice President

Stacy Apgar
Assistant Secretary

ACCESS TO HEALTHCARE

- Sanofi Patient Connection™
- Patient Assistance Connection
- Resource Connection
- Charitable Co-Pay Assistance
- Partners for Disaster Relief

2014

Even in developed countries such as the U.S., patients can have difficulties accessing medical treatment due to inadequate healthcare coverage. Patients are our number one priority and to meet their needs more effectively, Sanofi US launched an integrated patient support platform called Sanofi Patient Connection™, a comprehensive program designed to assist patients with a wide variety of services across the U.S. product portfolio. The program provides access and support to patients by connecting them to the assistance and resources they need.

Details of the Sanofi Patient Connection™ program can be found by clicking [here](#).

Two of the resources connected with the Foundation are Patient Assistance Connection and Resource Connection.

Patient Assistance Connection

Patient Assistance Connection – The Sanofi Foundation for North America makes it possible to provide medication at no cost to patients who have no insurance coverage or do not have access to the prescribed product or treatment via their insurance, and who meet eligibility requirements. Product is donated to the Foundation by the company for this purpose. Patients must meet financial criteria, and must be U.S. residents under the care of a licensed healthcare provider who is authorized to prescribe, dispense, and administer medicines in the U.S.

What are the financial eligibility requirements for the program?

Eligibility requirements range from annual household incomes of 250 – 500% of the Federal Poverty Level, depending upon the treatment under consideration.

Letters from Patients

“Thank you from my heart for providing me with my medication Multaq. May God bless who made it possible.”

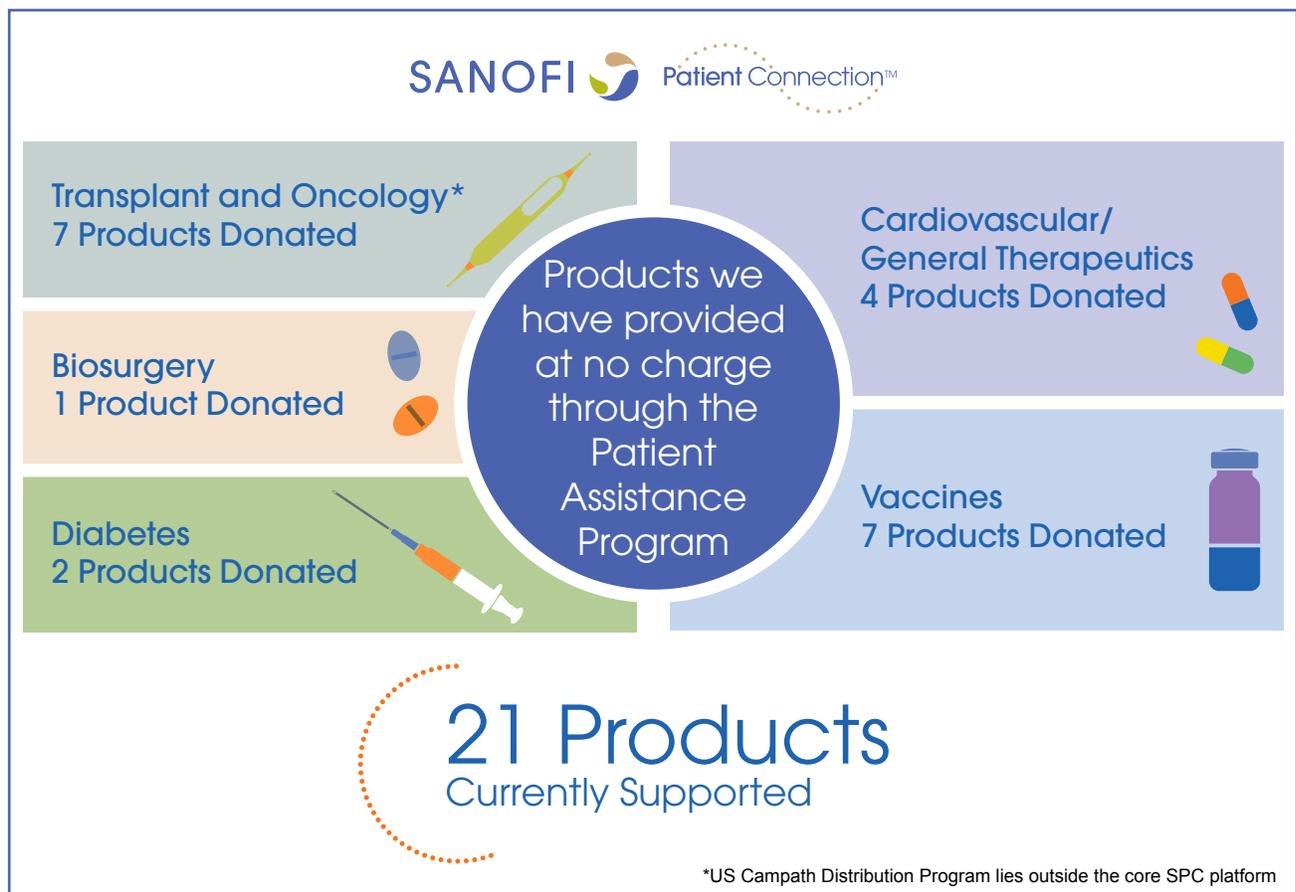

“Thank you for refilling my SoloStar insulin pens for me and thank you for giving me free SoloStar insulin. I have been a diabetic since age 40, today I am 49. Thank you for everything.”

“Thank you for sending Lantus to my doctor for my use. I appreciate the program that allows me to have received your help. This has been a real blessing and I am able to take my insulin because of your help. Thank you.”

Resource Connection

Resource Connection – Sanofi Patient Connection™ (SPC) is proud to offer a unique service titled Resource Connection. SPC counselors work directly with patients to determine if there are beneficial resources and/or services available in their community. Some examples of different types of resources/services the program helps to identify include:

- Clinical Support Services
- Nutritional Supplements (groceries, food banks, etc.)
- Transportation
- Health Supplies/Cosmetic Aids (wigs, scarves, etc.)
- Patient Advocacy Support
- Home Care Services (shelter, utilities, etc.)

Sanofi Patient Connection™

Charitable Co-Pay Assistance

The Sanofi Foundation for North America partners with national 501(c)(3) non-profit organizations to provide direct financial assistance to insured patients. These patients meet certain qualifications to help them afford the out-of-pocket costs associated with their prescription medications and/or treatments. Through these partnerships, the Foundation helps to improve overall patient health and wellness by providing access to the safe and effective medicines they need.

Partners for Disaster Relief

The Sanofi Foundation for North America partners with various Non-Government Organizations (NGOs) and Non-Profit Organizations (NPOs) to respond to disaster relief & recovery needs globally. There is financial support via annual donations and also in time-of-need product donations.

AmeriCares is a non-profit emergency response and global health organization. In times of epic disaster or daily struggle, they deliver medical and humanitarian aid to people in need worldwide.

Visit AmeriCares.org

Direct Relief's mission is to improve the health and lives of people affected by poverty or emergency situations by mobilizing and providing essential medical resources needed for their care.

Visit DirectRelief.org

Heart to Heart International is improving global health through initiatives that connect people and resources to a world in need.

Visit HeartToHeart.org

MAP International is a global Christian health organization that partners with people living in conditions of poverty to save lives and develop healthier families and communities.

Visit MapInternational.org

Project Hope's mission is to achieve sustainable advances in healthcare around the world by implementing health education programs and providing humanitarian assistance in areas of need.

2014

Foundation Social Investments Summary

While the financial commitments we make are just as important and impactful to the communities we assist, Social Investments encompasses much more than financial support. It's the time and resources we invest in giving back to the communities in which we live and work. There are a number of ways we partner in the community. Social Investments involves employees volunteering on individual and team levels, and it encompasses our national approach to enhancing employee engagement and community involvement. The image below captures a few examples.

*Company-provided support.

Volunteerism

Year-round volunteerism rallies our employees to contribute to our communities in various ways, whether it be individual/team-based, skill-based, or through a company-wide initiative.

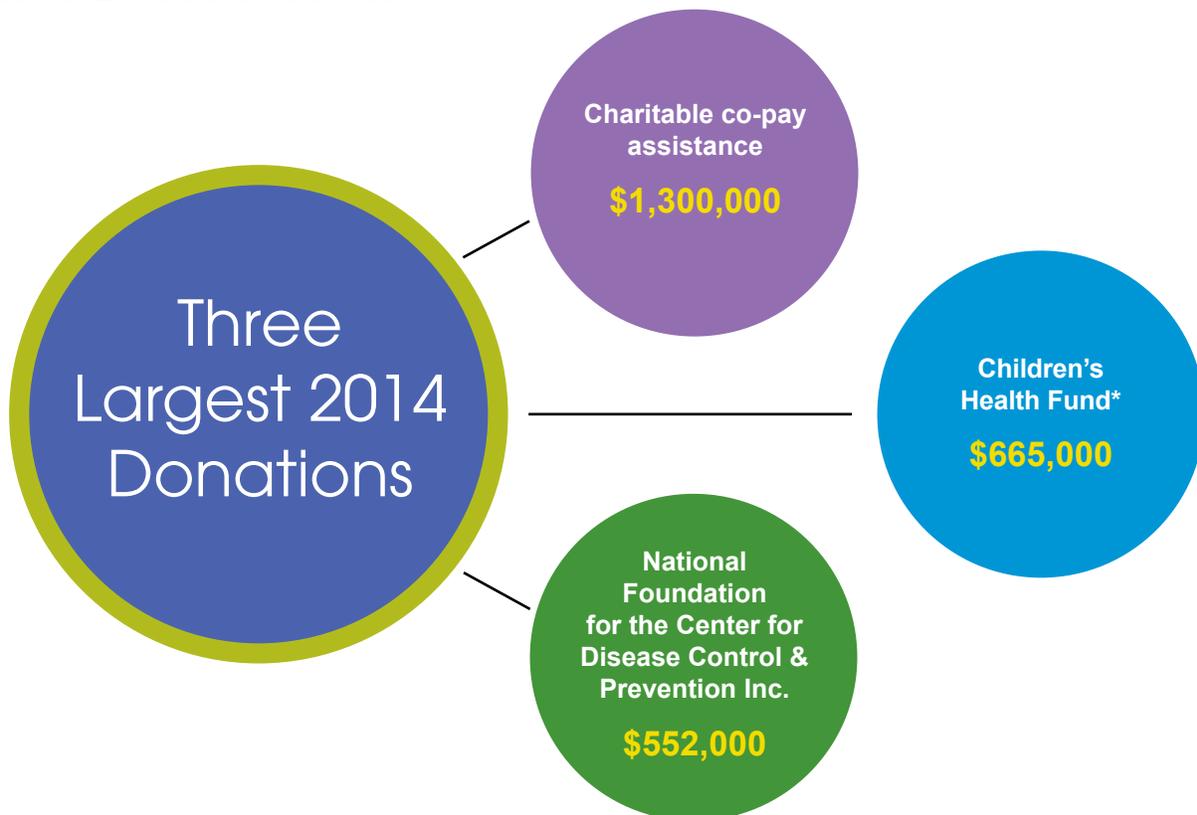

Our skill-based volunteerism focuses on capacity-building for non-profit organizations in need, including New Jersey-based Kids Corporation and Children's Health Fund. Individual/Team-based volunteerism takes place on a local and national basis throughout the year, with a strong focus on Sanofi Season of Solidarity (SSOS), a company-wide volunteer initiative occurring in the fourth quarter.

SSOS 2014 – Volunteering to Support a Healthier Community – had a great impact thanks to the passion and participation of nearly 2,000 Sanofi employees in North America under the guidance of NA Corporate Social Responsibility.

This theme not only encompassed the well-being of individuals, but also the holistic health of communities as a whole – communities in which our employees live and work. Projects spanned supporting equine-assisted therapy programs, to packing nutrient-rich meals for Ebola-stricken countries, to purchasing and delivering winter essentials for Head Start children.

Cash Donations

*See additional information about Sanofi's partnership with Children's Health Fund on page 20.

Employee Matching Gifts

The Sanofi US Matching Gifts Program, sponsored by the Sanofi Foundation for North America, demonstrates our interest in supporting employees' philanthropic concerns focused on organizations that benefit or increase health and social service, education, community outreach, etc. The program matches gifts to eligible organizations qualified for exemptions under Section 501(c)(3) of the Internal Revenue Code.

United Way Campaign

The Sanofi Foundation for North America is a key fundraising partner for the annual United Way Campaign, a community initiative that engages employees in a unified effort to raise funds in support of the United Way chapters in the regions where we live and work.

The campaign total of \$424,550.83 included employee donations along with the assistance of company matches from Sanofi Pasteur and Merial.

Thanks to the combined efforts, the 2014 campaign was the highest fundraising total in the history of the company's United Way annual campaign, which were followed by words of thanks from United Way staff, volunteers, and enthusiasts.

In response to this year's efforts, Mathilda Sheptak, Executive Director of the United Way of Monroe County, stated that she "is grateful for the continued support of Sanofi Pasteur. They are the largest contributor to our annual campaign and exemplify the true meaning of giving back to our community."

Ebola Virus Disease Response

Overview of the Foundation Response

With more than 25,000 people infected and nearly 9,500 deaths recorded by the World Health Organization (WHO) as of February 11, 2015, the Ebola outbreak mainly affected Guinea, Liberia and Sierra Leone. This has been the deadliest epidemic since the discovery of the virus in 1976.

In 2014, The Sanofi Foundation for North America donated \$150,000 to support the following organizations, which rapidly established initiatives to address the outbreak of Ebola Virus Disease in Africa.

 **Heart to Heart**
INTERNATIONAL
\$50,000

Operation Ebola

Heart to Heart International implemented Operation Ebola, which established an Ebola Treatment Unit to treat EVD patients and to establish/manage an Ebola testing lab in Liberia. Liberia is one of the five African countries experiencing the EVD epidemic and has the highest number of EVD cases to date.

 **+map**
INTERNATIONAL
\$50,000

Ebola Relief Response

MAP International's EVD response efforts encompass the distribution of infectious disease protection suits and supplies to protect those treating the infected. With efforts primarily aimed at Liberia, Guinea, and Sierra Leone, MAP International has provided more than \$10 million in essential medicines and protective gear ranging from outer protective layers to respirators and face shields.

 **CDC FOUNDATION**
Helping CDC Do More, Faster
\$50,000

Global Disaster Response Fund

The CDC Foundation is assisting the CDC's response to the Ebola epidemic in West Africa by providing critical assistance through donations to the Foundation's Global Disaster Response Fund. Since the epidemic began, more than 1,000 CDC staff have worked in West Africa or supported the agency's response from the United States. The Global Disaster Response Fund assists CDC staff in responding quickly to changing circumstances and needs on the ground in West Africa. Through the fund, the CDC Foundation is providing supplies and services for the response, such as infection control tools, vehicles and motorcycles, hiring of locally employed staff, exit screening supplies for airports, and implementation of various technologies to meet monitoring, surveillance and connectivity needs. Ultimately, the CDC Foundation is working with the CDC to facilitate an effective response to this epidemic while strengthening health systems in Guinea, Liberia and Sierra Leone to be prepared for future outbreaks.

Employee Engagement Partner: Stop Hunger Now

Stop Hunger Now is an organization that provides food and life-saving aid to the world's most vulnerable people, and works to end global hunger in our lifetime.

By addressing the problem of hunger in developing countries, they support populations that suffer from vitamin and mineral deficiencies and stimulate relief and longer-term solutions in addressing a broad range of interconnected humanitarian needs.

Stop Hunger Now distributes meals through feeding programs operated by partner organizations in developing countries that promote education, encourage children to attend school, improve students' health and nutrition, address gender inequalities, stimulate economic growth, fight child labor, and are part of the movement to address global issues.

www.stophungernow.org

Sanofi Foundation's Partnership with Stop Hunger Now:

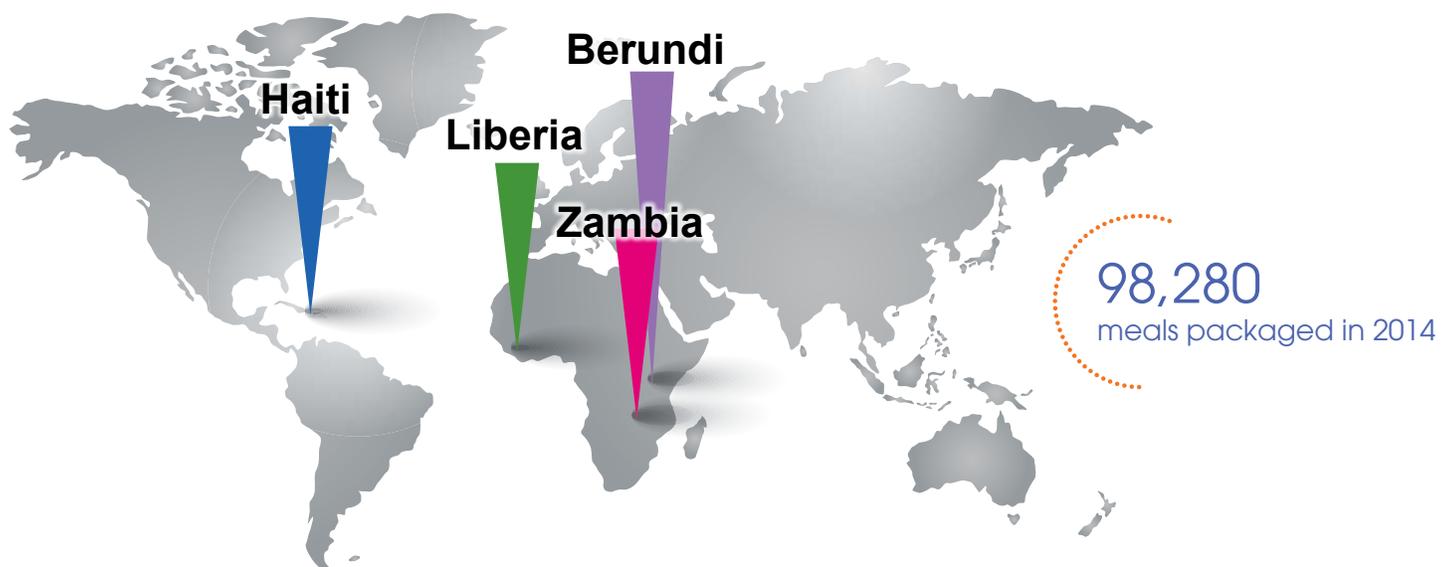

Thanks to Sanofi Foundation, Sanofi sites have hosted "Stop Hunger Now" events and packaged 98,280 nutrient-rich meals in 2014. Thanks to these events Sanofi has been a huge part of Stop Hunger Now's impact.

"Stop Hunger Now has partnered with Sanofi since November, 2013, and provided more than 108,000 meals to malnourished children in developing countries around the world. These meals provide hope for the children in our Transformational School Feeding programs, which wouldn't be possible without Sanofi."

Richard Armenia - Program Manager, Stop Hunger Now Philadelphia

Meals were distributed to:

Multi-Year Community Investment: Children’s Inn at NIH

Mission

The Children’s Inn at the National Institutes of Health (NIH) is a residential “place like home” for sick children and their families. Children come from across the country and around the world to stay together with their families in The Inn’s healing environment while receiving groundbreaking medical treatments at the NIH, the world’s leading biomedical research center. While the NIH takes care of the child’s medical needs, The Inn tends to the child’s heart, soul and spirit.

Partnership

In 2015, the Sanofi Foundation for North America continued its leadership support of The Children’s Inn at NIH, a private, nonprofit residence for children and families participating in groundbreaking pediatric biomedical research at The National Institutes of Health. The Sanofi Foundation contribution to the Sanofi-Aventis Legacy Endowment Fund provides valuable resources that help The Inn serve more than 1,500 seriously ill children and their families each year. The Inn is “A Place Like Home” that helps reduce the burden of illness by offering a safe, convenient, nurturing environment and hundreds of therapeutic, educational and recreational programs each year—all at no cost to the families. Ranging in age from newborn to 25, children and their families have come from all 50 states and more than 80 countries. The Sanofi Foundation is honored to support these courageous children and their families.

Patient Story: Bryce Greenwell

Bryce Greenwell, a six-year-old boy who likes building with Legos, watching Disney shows, and playing with his baby brother, Vance, 19 months, suffers from Acute Lymphoblastic Leukemia (ALL).

Diagnosed last December, doctors in Tennessee recommended considering a bone marrow transplant, but when Bryce’s cancer didn’t respond to standard chemotherapy, his parents learned about a clinical trial at the National Cancer Institute (NCI) at the National Institutes of Health called T-cell therapy. This type of treatment utilizes the body’s

immune system to kill cancer cells and entails taking some of Bryce’s T-cells, altering them in the lab, and reinserting them back into his body. The goal was that the altered T-cells would fight off the remaining cancer so that Bryce could then receive a bone marrow transplant.

During their stay at The Inn, Bryce’s mom says he “wore himself out” the first three days playing in the Playroom and on the Playground with the friends he met. He also enjoyed spending time with Vi, The Inn’s therapy dog. About a month and a half after leaving The Inn, Jenny and Dustin reported that Bryce was able to receive his bone-marrow transplant. It went so well that he was discharged only four weeks after the procedure. Now that Bryce is feeling better, the family is looking forward to boating at a nearby lake, as well as going to the Smokey Mountains vacation area of the state to play arcade games and ride go-carts. They are grateful for all the support they received while at The Inn and from their friends and family. “Bryce is our superhero,” says Jenny. “He makes us want to be stronger.”

www.childrensinn.org

Multi-Year Community Investment: Arrow Lake Foundation

Mission

Over the next several years the Foundation is engaging in an active strategic initiative focused on forging a public-private partnership with state and local governments to develop a comprehensive plan for the Arrow Lake area. This plan will include opportunities for conservation, recreation and education by using private funds to leverage public grants. In addition to the lake itself, the Foundation is currently discussing plans for hike/bike trails and a community garden and orchard. Funds from this grant request will help launch these and other projects.

www.arrowlake.org

2014 Primary Areas of Impact with Sanofi Foundation Donation:

The Arrow Lake Foundation continues to work to positively affect the Mount Pleasant, TN community through opportunities for conservation, recreation and education. In 2014 the Foundation, with an expanded Board of Directors, developed a strategic plan that includes establishing the Arrow Lake Foundation as a sustainable foundation, with multiple funding sources, including public/private partnerships with city, county and state organizations, along with local businesses and industries.

Funds provided by the 2014 Sanofi Foundation Grant allowed the Arrow Lake Foundation to provide grants to the following organizations:

- **Family2Family:** to provide Mount Pleasant Elementary School students with over 300 backpacks filled with required school supplies needed to start classes.
- **Mount Pleasant Community Foundation:** to establish an Arrow Lake Foundation Scholarship presented to a Mount Pleasant High School graduate with studies in Engineering or Medical fields.
- **Maury Regional Medical Center:** to host a Health Clinic, free to area residents.
- **The Mid-South Barbecue Festival:** to sponsor the Arrow Lake 5K Run.
- **City of Mount Pleasant and Tennessee Aluminum Processors:** to provide water lines to area residents that previously had no running water.
- **Mount Pleasant Elementary School:** to educate students about conservation by taking part in Arbor Day activities by planting trees.

The Arrow Lake Foundation continues working to open Arrow Lake to recreation and to develop approximately 1,200 acres surrounding Arrow Lake for education, conservation and recreational purposes.

Multi-Year Community Investment: Children’s Health Fund

Partnership

Over 11,000 homeless and vulnerable children will receive comprehensive and compassionate medical care at six mobile medical initiatives supported by the Sanofi Foundation for North America. The children call Children’s Health Fund’s mobile medical clinics, “doctor’s offices on wheels”. We call them medical homes. Doctors, nurses, social workers and dentists deliver more than 50,000 health care visits to children in some of America’s poorest, medically underserved communities.

Medical Home Initiative

Children’s Health Fund’s Medical Home Initiative, supported by Sanofi Foundation for North America, delivers high-quality health care to children in low-income urban and rural areas where medical services are especially scarce. Each participating program – from West Virginia to Southern Arizona – lies in a federally designated health professional shortage area, a community where there are too few doctors and other health care professionals to meet people’s basic needs. The initiative reaches over 15,000 homeless and low-income children and family members each and every year.

Our rural programs, such as those, help address a gaping hole in health care. Nearly 25% of Americans (70 million people) live in rural areas, but only 10% of doctors practice there. This fact often forces families of little means to travel great distances to find health care for their kids.

To fill this gap, Children’s Health Fund programs bring care right to children in their schools and communities aboard fully-equipped mobile health clinics.

Sanofi Foundation for North America Supports 8 of the 28 Mobile Medical Programs*

*28 mobile medical programs that incorporate a total of 51 medical mobile clinics

Hope Lodge

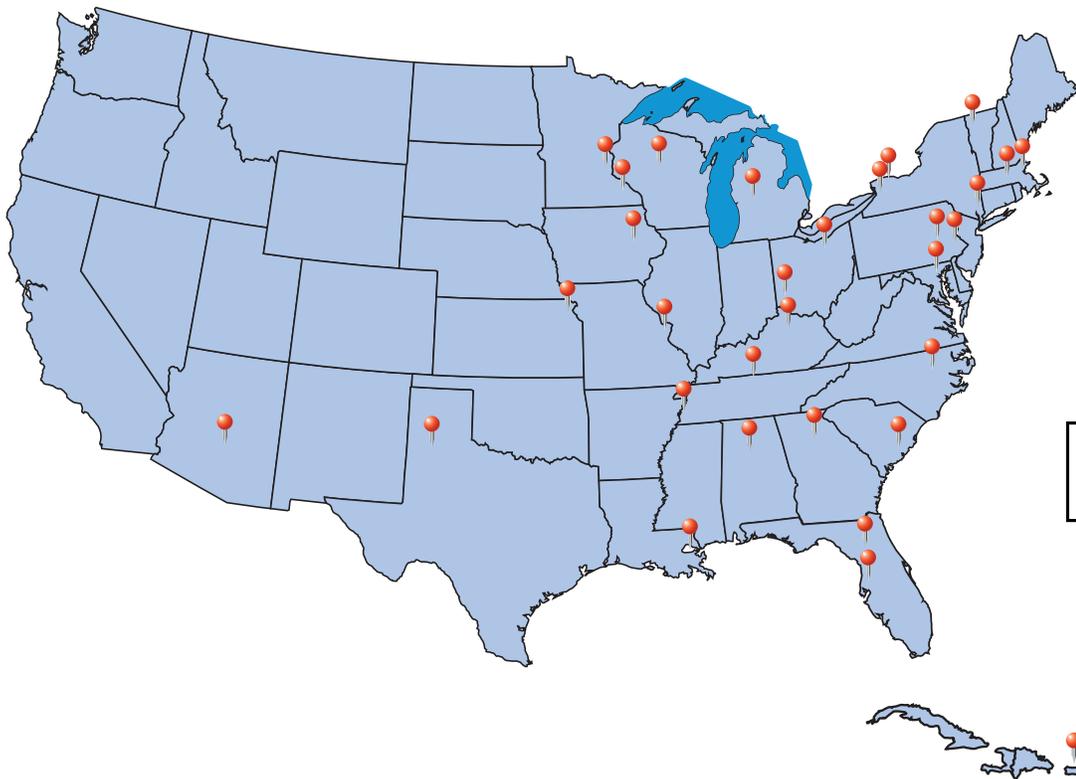

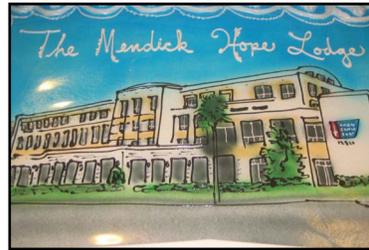

Hope Lodge®

Hope Lodge Overview

- Offers a free, temporary place to stay when the best treatment is away from home.
- Provides a safe, supportive environment where guests can focus on getting well.
- Brings a nurturing, home-like environment where guests can retreat to private rooms or connect with others.
- Presents a variety of resources and information about cancer and how best to fight the disease.

Year-Round Sanofi US Employees Involvement Via Volunteering & Community Outreach

Multi-Year Community Investment: Christ the King Preparatory School of Newark, NJ

Mission

Christ the King is a Catholic, college preparatory high school in Newark, New Jersey providing a quality education for young men and women with limited economic resources. Christ the King welcomes students of all faiths and cultural heritages. Christ the King promotes academic achievement, professionalism, and virtuous character through a challenging core curriculum and innovative corporate internship program for the purposes of transforming society.

Sanofi Foundation provides financial support to Christ the King but as an employer, Sanofi has also developed a partnership to be a member of Cristo Rey Work Study Program.

Sanofi is currently involved in this program in which eight students are hosted in Sanofi, Bridgewater, NJ, for internships with various departments throughout the school year. This program provides to students real world work experience. By the time they graduate, students have accumulated 1,400 hours of professional experience as well as critical contacts, enviable resumes, and necessary skill sets. Students work during standard business hours as part of a 4-student job-sharing team.

By immersing students in professional environments where they can cultivate relationships with mentors, supervisors, and executives, they are creating, in high school, the network that can propel them into a career that will permanently alter their and their families' futures.

"I've learned many important things in this program, including the functions of the different companies within Sanofi, and how they help people live better lives. Coming in, my goals were to work hard, gain as much knowledge as possible, and be an asset to everyone who needed my help. In the process, I found that I needn't be afraid of speaking up, and I discovered that there are people from many different backgrounds working at Sanofi throughout its various departments. From here, my immediate plans are to pursue a career in the medical field and become a doctor. In a more general sense, I am determined to not give up on my dreams and to keep moving forward in life."

Jennifer Romero,
Student at Christ the King, and recent intern at Sanofi

Multi-Year Community Investment: Cancer Support Community Central NJ

*The Whole Person, the Entire Family, a Personal Journey
So that no one faces cancer alone.®*

Mission

At Cancer Support Community Central New Jersey individuals affected by cancer are given an opportunity to enhance their health and well-being through participation in professionally-led programs of support, education and hope.

Sanofi Foundation is consistently active to stand with Cancer Support Community Central New Jersey and to ensure that all people impacted by cancer are empowered by knowledge, strengthened by action, and sustained by community.

Right now more than 150,000 people are living in Central NJ with a history of cancer, 25% are raising children under the age of 18. Thanks to the generous support of Sanofi US North America, Cancer Support Community Central NJ (CSCCNJ) secured the funding to launch its School Based Support Group pilot program for teenagers coping with their own cancer diagnosis or the diagnosis or death of a loved one. As experts in oncology mental health, CSCCNJ provides essential programs that address the emotional and social impact of the disease on all people affected, including patients, survivors, family members of all ages, and caregivers. Donations make it possible to provide, at no charge, access to individual and group support, educational workshops, healthy cooking and nutrition programs, and health and wellness classes.

www.cancersupportcnj.org

Local & National Contributions

Here are some examples of the various partnerships we've established to support organizations throughout North America.

For two decades, over 4,500 high school students have taken part in the Sanofi BioGENEius Challenge Canada (SBCC), a nationwide research competition that encourages young minds to pursue careers in the growing field of biotechnology. Inspired by the question “How will you change the world?”, Canadian teens gain crucial experience working in professional laboratories, with mentorship from leading scientists and academics. Far from a regular high school science fair, SBCC participants have made astounding discoveries, many of which have been patented and commercialized. Examples from the past 20 years include innovations related to crop disease prevention, plastic decomposition using bacteria, and anti-cancer agents.

www.sanofibiogeneiuschallenge.ca

Mission

In 1899, a group of citizens and physicians who wanted better medical care for the residents of Somerset County purchased a house in Somerville and converted it into a 12-bed hospital. That same spirit of giving and commitment to community continues today through generous donors to Somerset Health Care Foundation.

Somerset Health Care Foundation is the 501(c)(3) non-profit organization created to solicit and administer charitable funding on behalf of Robert Wood Johnson University Hospital Somerset, which today is a technologically advanced, 355-bed non-profit teaching hospital. Financial support from individuals, private foundations, corporations and community organizations make it possible for the medical center to meet the demands for physical growth and modernization, community health/education programs and recruitment of superior clinical professionals.

By supporting Somerset Health Care Foundation, you are making a difference in the health care of our community and ensuring that residents and employees throughout central New Jersey receive the finest medical care possible.

www.rwjuh.edu/smcf/foundation.aspx

Mission

Kids Corporation is a direct provider of academic and healthcare programs in Newark, NJ, and a conduit for the distribution of free educational resources to other non-profits for youths in Newark. They reach over 4,000 children annually through summer and after-school programs as well as those of their Partner Programs: 50+ community and faith-based organizations and schools throughout Newark. While children are their primary focus, they believe that assisting local groups uplifts the entire community. Through their unique combination of after-school, school-day and summer programs, children develop literacy, motivation for learning, a love of nature, and hope for their future.

www.kidscorp.com

The Montgomery Township Education Foundation is an independent, non-profit organization set up to support strategic programs for the benefit of the Montgomery Township public school children. The Foundation's goal is to raise money for the purpose of improving our children's educational experience, acquiring supplies and equipment and providing innovative teaching and learning systems for our children. Following our first successful endeavor, Cougar Stadium, we have had extensive conversations with school Principals, administrators, students and parents to gain an appreciation of where we can help. We meet on a regular basis to discuss the ideas and determine how we can fund the programs that will benefit the most students. Our new projects will enhance programs in science, language arts, and music and also provide assistance for students who are academically at-risk.

Massachusetts

Mission

One Fund Boston was formed by Governor Deval Patrick and Mayor Thomas M. Menino on April 16, 2013 with the purpose of helping those most affected by the tragic Marathon bombings. Through the overwhelming generosity of individuals, corporations and foundations from around the world, the Fund collected and distributed nearly \$61 million in the first 75 days to over 230 individuals who were most affected. Since then, One Fund Boston has continued to be a resource for those who lost loved ones, survivors, and their families. The financial need continues for many and especially for those who will need long-term care for prosthetics and other lifestyle modifications for the rest of their lives. One Fund Boston plans a second distribution this summer.

THE UNIVERSITY
of NORTH CAROLINA
at CHAPEL HILL

STEM Education - Pharmacoepidemiology Program

Mission

The University of North Carolina at Chapel Hill, the nation's first public university, serves North Carolina, the United States and the world through teaching, research and public service. We embrace an unwavering commitment to excellence as one of the world's great research universities.

Our mission is to serve as a center for research, scholarship and creativity and to teach a diverse community of undergraduate, graduate and professional students to become the next generation of leaders. Through the efforts of our exceptional faculty and staff, and with generous support from North Carolina's citizens, we invest our knowledge and resources to enhance access to learning and to foster the success and prosperity of each rising generation. We also extend knowledge-based services and other resources of the University to the citizens of North Carolina and their institutions to enhance the quality of life for all people in the State.

With lux, libertas — light and liberty — as its founding principles, the University has charted a bold course of leading change to improve society and to help solve the world's greatest problems.

www.unc.edu

Penn

STEM Education - Pharmacoepidemiology Program

Mission

Penn Medicine is committed to remain a world-leading institution in three equally valued and inter-related missions of patient care, education, and research. The success of these missions requires the integration of the School of Medicine and Health System and a shared destiny with the University of Pennsylvania. By recruiting and retaining a world-class faculty and staff who strive for excellence, innovation, quality, and professionalism, we will accomplish our missions. Our goal is to be recognized nationally as the most accomplished and respected School of Medicine and Health System.

Mission

The Trevor Project is determined to end suicide among LGBTQ youth by providing life-saving and life-affirming resources including our nationwide, 24/7 crisis intervention lifeline, digital community and advocacy/educational programs that create a safe, supportive and positive environment for everyone.

Mission

Her Justice engages the vast talent and resources of New York City's law firms, bringing together committed lawyers and determined women to secure life-changing results.

The women served by Her Justice face poverty and abuse every day. They struggle to care for their children and keep them safe from harm.

Mission

Established by Congress as an independent, nonprofit organization, the CDC Foundation connects the Centers for Disease Control and Prevention (CDC) with private-sector organizations and individuals to build public health programs that make our world healthier and safer. Since 1995, the CDC Foundation has provided \$400 million to support the CDC's work, launched more than 700 programs around the world and built a network of individuals and organizations committed to supporting the CDC and public health.

Each CDC Foundation program involves a talented team of experts at the CDC and at least one outside funding partner. Sometimes, a program begins with a CDC scientist who has a great idea and wants to collaborate with an outside partner to make it happen. At other times, organizations in the private sector recognize that they can better accomplish their own public health goals by working with the CDC through the CDC Foundation.

Stop Hunger Now has been partnering with Sanofi since November, 2013, and has provided more than 108,000 meals to malnourished children, in developing countries around the world. These meals provide hope for the children in our Transformational School Feeding programs and they wouldn't be possible without Sanofi.

Richard Armenia, Program Manager of Stop Hunger Now Philadelphia
(Page 21)

United Way is grateful for the continued support of Sanofi Pasteur. They are the largest contributor to our annual campaign and exemplify the true meaning of giving back to our community.

Mathilda Sheptak,
Executive Director of the
United Way of Monroe County
